Getting the Original Height and Width of an Image

>> Is there a simple way to get the pixel sizes of images (jpeg and gif)
>> in Metacard? In HyperCard, I use the picture command to open them
>> invisibly (this is important), then fetch the size. The picture
>> command does not seem to be part of MetaCard.
(snip)

To do this, import an image and check these props:

```
the formattedheight of image "xxx"  
the formattedwidth of image "xxx"
```

This will return the original height and width of an image.
