Using 'setProps' With a Custom Property Set

>I don't think there is currently a way to do that. If you have:
>
>setProp myArray theValue
> -- stuff here
> pass myArray
>end myArray
>
>... and you execute "set the myArray[10] of this stack to 100", you will
>trigger the setProp handler, and 'theValue' will contain '100', but you
>won't be able to retrieve the '10' key.
>
>Am I wrong? I'd love it if I were...

Sorry. I missed the beginning of this. Is this what you need?

```
on mouseUp
  set the myArray["age"] of me to "very old"
end mouseUp

setprop myArray[whichKey] pValue
switch whichKey
  case "name"
    answer "Your name is" && pValue
    break
  case "age"
    answer "You are" && pValue
    break
end switch
end myArray
```
