## Creating a Directory on an FTP Server

>Knowing nothing about FTP, what command do I send with the new LibURL  
>internet library to create a new folder on an FTP server? I'm assuming  
>that there's no built in way to do this, right? Thanks!

If you upload a file to a nonexistent FTP directory, the directory is created for you, so you can use that as a workaround:

```
-- create an empty file in the nonexistent directory:  
put empty into URL "ftp://name:password@example.com/newdir/dummy"  
  
-- this creates the directory and the file in it. Now delete the  
-- unwanted empty file to leave just the new directory:  
delete URL "ftp://name:password@example.com/newdir/dummy"
```
