New runrev.com Mailing List Archive	The current mailing list archive for MetaCard hosted by Runtime Revolution.
Revolution Community	
Fourth World Revolution Embassy	The Revolution Embassy hosts a number of really cool utilities for Rev, including Go RevNet, the plug in allowing you to utilize the always updated RevNet stack providing stacks, links and downloads to the Rev and MC developer. Way to go 4W!
Shao Sean's Web Site	Provider of libSMTP and other objects for Revolution and MetaCard.
Fred Rinaldi's Web Site	Long time provider of XCMDs and XFCNs for HyperCard; now has a bunch of stuff for the Revolution developer.
Altuit Web Site	Chipp Walters has a whole bunch of useful scripts, downloads and plugins for Revolution and MetaCard over at his site.
Klaus Major's Web Site	Klaus has a page of very cool utility programs for use with Revolution and MetaCard, including Heim2, his tool palette replacement stack.
HyperActive Software	Jacqueline Landman Gay provides tutorials and tips about Revolution.
Mark Talluto's MC Mirror	Mark has a mirror site for downloading MetaCard 2.3.2 on up. Mac, Windows and Linux releases are available.
Sweat Technologies	A bunch of really useful stuff here, including libXMLText, libCursor, libColor and more.
Blue Mango Multimedia	Trevor DeVore's site that includes the essential Enhanced Quicktime External and libDatabase, among others.
Sarah Reichelt's Web Site	Sarah has some wonderful add-ons for Revolution, including a POP library, and SMTP library, and a cool calendar widget, along with tutorials and plugins.
Reference Links	
Tactile Media	MCI control documentation (for use with MCISendString)
PCRE Organization	Perl-Compatible regular Expressions (PCRE) documentation (for use with $matchText$, $matchChunk$ and $replaceText$).
Biblioscape	RTF Format 1.5 Specification
Apple Computer	Dives into how bundles work in OS X - a must read!
Applelust.com	This article gives a good overview as to the differences between Carbon and Cocoa applications.
AppleScript Links	
Late Night Software	The source for the best AppleScript tools on the net.
The AppleScript SourceBook	A repository of information about AppleScript.
Tutorials	
Creating a Standalone StatusItem Menu	This is a ScreenSteps tutorial on the methods of how to use XCode 3 to make a StatusItem menu (a global icon menu that is shown like the date/time and Airport status in the menubar)
