Upgrade >>

Need your applications or programs to run automatically when your system boots? The best way to do that is by deploying them as a Windows service.

Easily Create, Manage, Monitor and Schedule Windows Services
Improve the reliability of your third party or custom applications. Run any application program written in any language (e.g. EXE, DLL, Perl, Python, Java, BAT/CMD, Powershell, PHP, Ruby etc.) as a Windows Service with FireDaemon Pro.

Windows Service

Run any application or program as a native background service in Windows. Monitor and restart your apps if they crash, hang or shutdown. Schedule apps to run at specific times or dates.

Complete Control

Manage from anywhere, anytime. Monitor the availability and resource consumption of individual or groups of FireDaemon Pro and Windows services, restarting them if necessary.

Access & Management

Access and manage your interactive FireDaemon Pro or Windows Services on Session 0. Easily switch to and from Session 0 from your user session.
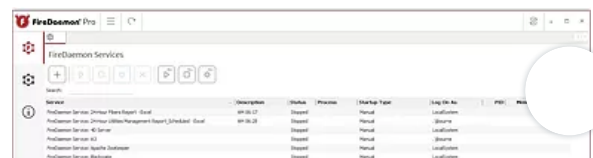

Unlimited Re-Distribution

Integrate with your application & platform. Unlimited re-distribution. Re-brand with your logo/theme. DRM Free. Embed with OEM or pay per use with MSP.
